

The 2nd Sociocultural Theory in Education Conference: Theory, Identity and Learning

10 and 11th September, 2007

University of Manchester

CALL FOR ABSTRACTS

Participants are encouraged to submit abstracts and papers in advance for publication on the conference website, and subsequently for reading prior to the sessions. Apart from the keynote addresses, we do not intend that other papers will be presented orally; however, participation in academic debate is very much the ethos of the conference. We see the purpose of the abstracts/papers as being to fuel the discussion, and also to give participants the opportunity to share their ideas with others in a spirit of collegiate collaboration.

Conference Theme: Theory, Identity and Learning

This conference aims to stimulate debate and to inform understanding of new ways of theorizing the active subject within socio-cultural theory within the context of empirical studies of learning in school and other learning contexts. One expected theme of the conference will be socio-cultural perspectives on explanations of how acting subjects (ie: educators and learners) learn their different identities within schools and other learning contexts. Papers are also expected to draw on theorists such as Wenger, Holland, Gee, Halliday, Hasan, Bernstein, Engestrom, and Cole in

the study of learning. We especially welcome papers which challenge theoretical positions and which attempt to situate school or educational practice within wider macro-societal discourses of social class, gender or policy. We welcome empirically based studies in different learning contexts.
