

European CSCL Award for Excellence in the Field of CSCL Research and/or Development

The Kaleidoscope¹ CSCL SIG sees the *European CSCL Award for Excellence in the Field of CSCL Research and/or Development* as a way of honouring and stimulating high quality research and/or design and development in the area of CSCL.

Nomination procedure

Nominations for this award can be made by members of Kaleidoscope and/or participants in the CSCL community in Europe. The nomination takes the form of an endorsement of the quality of an article relating to CSCL (e.g., on research, design, or development) that has either been published in an acknowledged scientific journal or book (peer reviewed) and/or that has been presented at a national or international conference that makes use of a blind review system. Nominations consist of a motivation (approximately 500 words) from the person that nominates and the accompanying article, paper or book chapter written by a researcher and/or developer or a team thereof. For this award, work that has been published or presented within the last 24 month is eligible.

Criteria

In CSCL the core focus is how and what students and other actors learn in collaboration with each other when supported with specific artefacts and technologies. This perspective constitutes the foundation for this award.

The specific criteria are that a European researcher and/or developer (or team thereof) or a non-European researcher and/or developer that has carried out her or his work at a European institute has, through her or his work:

- (1) advanced present knowledge in CSCL through originality in theory and/or methodology or has designed, developed and/or implemented an innovative CSCL environment or tool;
- (2) made innovative use of methods, extending the approaches available to conducting empirical research and/or development in the CSCL field;
- (3) integrated research and theory grounded in a variety of intellectual traditions into his or her own research and/or development; and
- (4) suggested particularly insightful implications for improving practice, design or has generated or extended theory in potentially useful ways for researchers, practitioners, developers or designers.

Key aspects that will be used in the evaluation of the work

The primary evaluation criteria are *originality, clarity and relevance* of:

- (1) purpose or objectives
- (2) conceptual, theoretical, or design framework
- (3) research and/or design approach/methods

¹ Kaleidoscope is a Network of Excellence which brings together European teams in technology-enhanced learning. It integrates more than 80 research units from around Europe, covering a large range of expertise from technology to education, from academic to private research. Altogether, it is a community of more than 1000 researchers in 23 countries which have joined in their efforts to develop new concepts and methods for exploring the future of learning with digital technologies.

European CSCL Award for Excellence in the Field of CSCL Research and/or Development

For research only:

- (4) data sources and methods of analysis
- (5) findings or results
- (6) conclusions and implications
- (7) significance of the study.

For design and/or development:

- (4) originality and/or grounding in previous work;
- (5) utility, usability and usefulness of the environment or tool based upon well stated design rationale;
- (6) findings or results;
- (7) conclusions and implications; and
- (8) significance of the environment or tool for advancing learning in and/or design of CSCL environments.

If the nominated work is non-empirical in nature, then other criteria apply, such as:

- (1) Does the author present arguments and counter arguments?
- (2) Is the presentation systematically and well- reasoned?
- (3) Is there a logical and rational flow in the argumentation?
- (4) Are the range and scope of literature and opinions presented and referenced in an appropriate way?

Review committee

- Professor Frank Fischer, Knowledge Media Research Center, Tuebingen, Germany
- Professor Gerry Stahl, Drexler University, Philadelphia, PA, USA
- Professor Heinz Mandl, University of Munich, Germany
- Professor Paul A. Kirschner (Chair), Utrecht University / Open Universiteit Nederland, The Netherlands

The award is endowed with 1000 Euro.

The nomination including the nomination text (approx. 500 words), affiliations and full addresses of the nominator and the nominee, as well as a copy of the scientific article to be considered should be sent by email to

p.a.kirschner@fss.uu.nl or by snail mail to
